## A greener blue planet

Last March, an unprecedented forum in Perpignan laid down the foundations for an **innovative** and **responsible** society.

For its first edition, "Le Monde Nouveau" brought together some 7,200 people in the Catalan city.

Business leaders, elected officials, students... All mobilized to invent an **audacious** and **resilient** future which repositions **the human being** at the centre, as an actor in the protection of our planet.

**Together**, we can catalyse the positive energies of our beautiful Occitanie, so rich in solutions through the diversity of its territories.

For the oxygen of our future and that of our children, for a greener blue planet.

Groupe La Dépêche du Midi is a global news and communication company, which operates throughout the 13 departments in Occitanie as well as in Lot et Garonne.

For 150 years, it has defended humanist, secular and republican values.

Every day, in a south-west France, from the Gers to the Gard and from the Aveyron to the Spanish border, nearly one million people read one of the Group's newspapers, while our web sites record 20 million unique visitors per month.
